ÖNALLAR

Every new page is the start of a new story.

We will be with you with our renewed face in our brand journey that has been going on for three generations.

Thank you for your trust in our products one

Thank you for your trust in our products and us...

We have always believed in this land and its values that make us who we are...

ÖNALLAR

We have the great pride of being able to carry on the adventure that our founder Halil Ibrahim ONAL started in 1957 with cheese production. We can say that Mr. Halil, who started to deal with livestock in his childhood years, started his business by selling cheese he made with milk from cows in the district center. When he came to his youth years, he improved the trade he started in his childhood, making it from the Kars region and continuing to sell the cheese he brought, making a significant way to trade cheese.

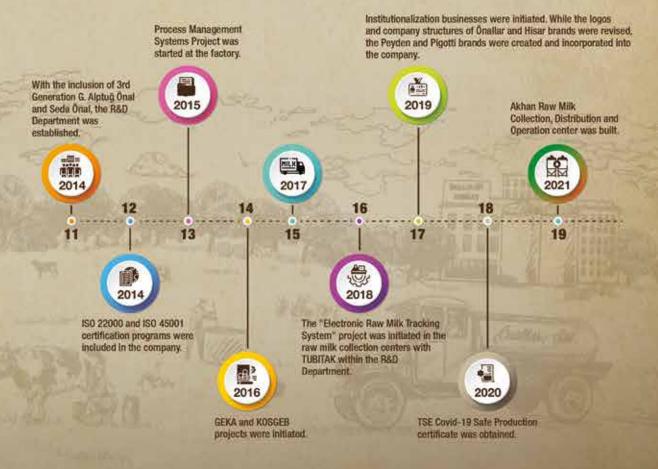

After his son Ali ÖNAL joined the company in 1975, cheese production was diversified by enlarging the workshop. Afterwards, a butter factory was established to produce Denizli Karın Butter, and a dairy farm was established in Çal region to produce Strained Yogurt. Önallar Gıda, which has strengthened its infrastructure by following all technological developments since its establishment, started to produce Classic White Cheese by enlarging and strengthening its dairy infrastructure in the 2000s.

With the inclusion of Halil Alptuğ ÖNAL and Seda Önal in the company organization as the 3rd generation in 2014, the R&D Department was established and studies on product and process development were started. Subsequently, ISO 22000 and ISO 45001 certification programs were included in the the company in order to produce quality and safe food, which is our mission. Since 2015, "Process Management Systems" and Electronic Raw Milk Tracking Systems projects have been initiated within the scope of TUBITAK, GEKA and KOSGEB, respectively. In 2019, institutionalization studies were started for our company and Peyden and Pigotti brands were created. In 2020, TSE Covid-19 Safe Production Certificate was successfully obtained as one of the firsts dairy industry.

We are happy to continue to offer the products we produce with the love of adding value to milk, without sacrificing quality, to all our domestic and international consumers. In this process that has passed for more than half a century, we have served and will serve by staying true to the principles and moral values we learned from our founder Halil İbrahim ÖNAL.

Because with our commitment to our family heritage; We have always believed in this land and its values that make us who we are.

For making discoverable the taste that butter leaves on the palate, we produce butter that melts in the mouth, by aging the creams that we have carefully produced for generations without cultivating. With Peyden Unsalted Packaged Butter, we guarantee you to make pastries and desserts where you can feel the sweet note of milk.

Butter is a rich source of energy due to it has a high content of milk fat. It is a nutritious dairy product that contains "essential fatty acids" that are not produced by the human body.In addition to all these features, we offer the most delicious form of butter with our traditional production methods, which is our Peyden family heritage

"The sought-after flavor of breakfast, white cheese, is one of the most frequently consumed dairy products among the traditional cheese varieties of Turkish Cuisine. Whole White Cheese is produced of milk with the magical touch of Peyden's masters. It is presented to your table as the freshest form of cow's milk. White cheesehas varieties such as salty and less salty in terms of taste. It also has different varieties, including full-fat and semi-skimmed.

Whole White Cheese

Fresh, soft, unique smell and taste of milk on the palate makes Shaped White Cheese one of the indispensables of the Peyden goods. This cheese, which we can call the White Gold of Denizli, is a favorite for gourmets with delicate palates with its flavors."

PAs Peyden family, we take care of our traditions and cultural heritage and approach the production of our local cheeses with care and attention. We continue to keep the unforgettable tastes, which are our past heritage, alive on the palate with the milk of cows, goats, and sheep that we carefully collect.

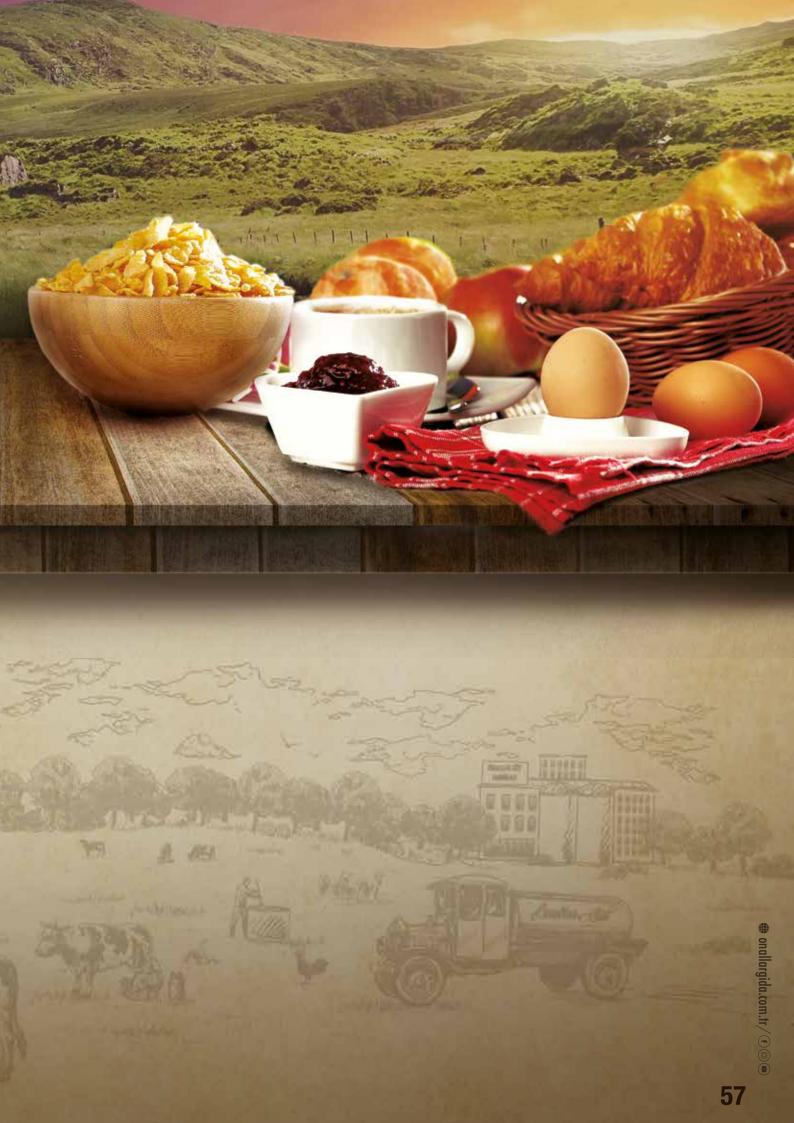

Turkish Creamfor Breakfast

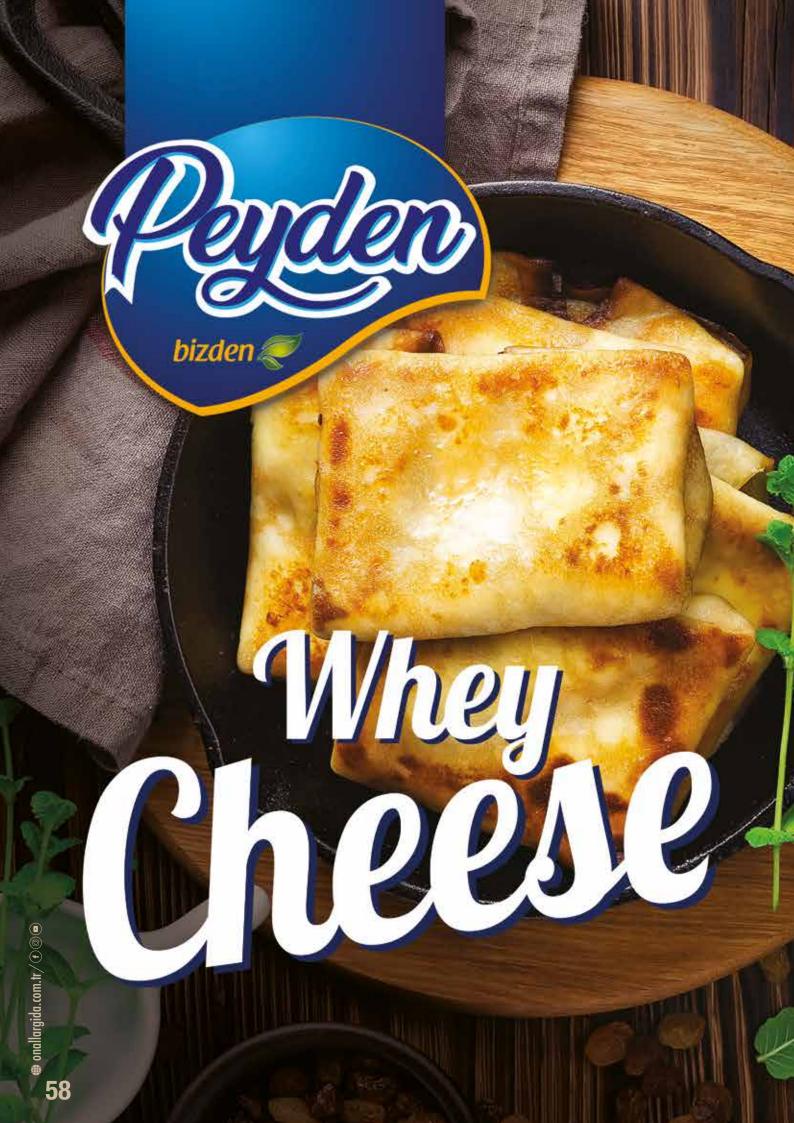

Peyden Turkish Cream is the result of the knowledge that has been gained over generations. It also has great laborship and studiously monitored quality. Peyden Turkish Cream, made from fresh cow's milk in Önallar Farm, is a delicious flavor that we obtain by condensing the fat of the milk.

Our Perspective on Food Safety and Quality...

In line with the Food Safety Policy we have implemented as Önallar Gida, by our expert staff in our facilities with the latest technology; We conduct failure mode and effects analysis at every stage of the food production chain; raw material supply, goods acceptance, product input control, production, resting, packaging, storage and shipment. As a result of these analyzes, we determine critical control points where necessary and prevent any problems that may arise at these points before they occur. Because of measures taken, we are able to produce reliable foods that comply with national and international quality standards, as well as ensuring the sustainability of the current system.

We are constantly improving this system that we have established in according to the legal regulations, national and international standards, the necessities of the time, technological developments and the demands and expectations of our customers.

Products produced by integrating tradition with modern technology, and all inputs used in the production of these products, are checked for compliance with the necessary legal regulations in our laboratory, where quality and hygiene standards are provided. Our all products and production methods are environmentally friendly.

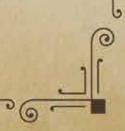

And it is delivered to the tables of our consumers without breakage the cold chain.

Based on the principle that "Quality and Food Safety is Everyone's Business" in all units of our organization, we ensure continuity of improvement and development studies, and minimize risks by prioritizing food safety.

We have a main aim training personnel who solve problems and embrace their work at all levels of our organization, with a principled, contemporary management approach that considers employee satisfaction. We organize continuous education programs in order to improve the awareness of quality and food safety in our personnel, and we give them planned duties, authorities and responsibilities regarding quality and food safety. We know that real quality would only be provided by employees who love their company and enjoy their work. For this reason, we work with the principle of ensuring the satisfaction of our employees at the highest level.
